

SSA+S Technology Adoption Program

SSA+S is in the process of performing a complete overhaul and update to its technology needs as part of our move to our new facilities.

While some of our equipment is provided through our capital funding, many of the new Federal and State requirements are not fully funded leaving our students with technology needs that either cannot be met with the current funds, or will cause significant disruption to their education if not addressed.

We have identified IT equipment and related items that are needed to support our students in the upcoming year. On a first come, first served basis, SSA+S is offering you the ability to Adopt a Piece of Technology at SSA+S!

For the listed price, SSA+S will purchase the item in your name with a name plate affixed to the item. Name plates will be attached with inscriptions such as, "Donated by the Smith Family," or "Smile! – ABC Orthodontics."

Items will be added or removed from list as they become available. While type of item may determine plate placement, SSA+S has final say in selection and placement of all items. Master list will be on the PTSS website at www.ssas.org/PTSS/PTSS.htm

Please include Item # on all forms.

Thank you for your support.
