

Generation Green Team

SSA+S Generation Green Team is an after-school organization at Sarasota School of Arts and Sciences.

We support: Environmental Education
Sustainable Economics
Community Service

Our mission is to bring awareness to our school and community about renewability, recycling and healthy - living green programs!

We have partnered with several local businesses in our community to help our students understand not only the importance of being good stewards of the Earth, but to also learn how to actively participate in our community helping to create a healthier environment by participating in service and volunteer programs.

Generation Green Team will continue to make a difference at our school by acting as the **official recycling team** and will maintain our **Vegetable Gardens and Pick-it Fence Fruits** to **provide healthy fruits and vegetables** to our **SSA+S families and our community**.

We look forward to a fun and productive year!

GGT at Work!

Every Thursday 4-5 p.m.
